EXPERIENCE

FRONTEND WEB DEVELOPER
2021 - NOW
L-ONE SYSTEMS GMBH - FULL TIME (SEPTEMBER 2021 UNTIL NOW)

L-One Systems is a German-based firm that contains **50+** employees and provides software solutions to their customers like websites and mobile applications, and I am currently working with them in their office in Damascus. And my duties with them are:

- Creating and maintaining the front-end for various mid-to-large-scale web applications.
- Building reusable components and services and unit testing them to ensure all works as expected.
- Designing and integrating new features that aim to improve business efficiency for their clients.
- Collaborate with stakeholders (designers, engineers, product owners).

FRONTEND WEB DEVELOPER & UI/UX DESIGNER
2018 - 2021
TIEQODE - SELF-EMPLOYED / PART TIME (3 YEARS AND 9 MONTHS)

At the end of 2018, I started TIEQODE as software solutions online company with a group of my colleagues, we worked with a lot of clients inside and outside my country, and all of those clients give us good feedback about our work. My main job with TIEQODE team was:

- Create the front-end part of websites like e-commerce, portfolio, blogs, and landing pages.
- Design mobile application user interface elements and layouts (UI/UX Design).
- Create wireframes, concepts, prototypes, and UI mockups.

UI/UX DESIGNER
2019 - 2019
WIZME - REMOTELY / PART TIME (3 MONTHS)

Wizme is a UK company with a team of around 20 employees. We worked together on their own product which is a meeting and group booking management solution for venue intermediaries, and organizations that provide end-to-end automation of the booking process. My role with them was:

- Gather and evaluate user requirements in collaboration with product managers and engineers.
- Design graphic user interface elements, like menus, tabs, widgets...etc.
- Conduct layout adjustments based on user feedback.

OPEN SOURCE CONTRIBUTIONS

When I was in college I've created a GitHub account to put the codes that I learned with it, and some of my side projects, as well as the projects that I made during my study years to let other people benefit from them. You can see these open source projects here: https://github.com/ali-mohammed-khair-nasser

EDUCATION

MASTER'S DEGREE, WEB SCIENCE (ONLINE)
2021 - NOW
SYRIAN VIRTUAL UNIVERSITY (SVU)

The work experience and the knowledge that I've gained from college prepared me well to continue my higher education. So I started a master's degree at SVU because it is one of the best universities in Syria, and this master's will help me get more skills that will put me on the right way to pursue professional experience and let me stay up to date with the latest technologies in the world of web design & development.

BACHELOR'S DEGREE, COMPUTER SCIENCE & ARTIFICIAL INTELLIGENCE
2016 - 2021
DAMASCUS UNIVERSITY - FACULTY OF INFORMATION TECHNOLOGY ENGINEERING

I was always fascinated by computers and technologies in general, and at school, Math and computer science were my favorite subjects. They were taking me to another world where time does not exist. Thus, I knew for sure that computers should be at the heart of my future career. So after finishing my study in high school with a honor degree, I choose to study at the faculty of information technology engineering at Damascus University as I saw it as an essential field for all organizations and it offers plenty of opportunity for progression and growth.

SKILLS

5 years ago, I started to learn the first web language "HTML" and within these years I have been learning Web & UI/UX design depending on online courses and self-learning. In addition, I have been learning Python and Java with JavaFX programming languages and many other programming concepts for 5 years in the ITE collage of Damascus university.
